

KATHLEEN A. ISSEN, Ph.D., P.E.

Assistant Professor

Mechanical & Aeronautical Engineering

Clarkson University

Potsdam, NY 13699-5725

Phone: 315-268-3880, Fax: 315-268-3880

E-mail: issenka@clarkson.edu

Website: www.clarkson.edu/~issenka

EDUCATION

Ph.D., Theoretical & Applied Mechanics, Northwestern University	2000
M.S., Theoretical & Applied Mechanics, Northwestern University	1997
B.S., General Engineering, University of Illinois	1983

LICENSURE

Registered Professional Engineer in Illinois (License No. 062-044422)	1988 – Present
---	----------------

PROFESSIONAL EXPERIENCE

Clarkson University, Assistant Professor	2000 – Present
Northwestern University, Faculty Intern	1999 – 2000
Northwestern University, Research Assistant and Teaching Assistant	1997 – 1999
Abbott Laboratories, Section Manger	1987 – 1997
Baxter Health Care Corp., Energy Manager/Plant Operations Engineer	1986 – 1987
Impell Corporation, Engineering Analyst	1985 – 1986
Sargent & Lundy Engineers, Engineering Analyst	1983 – 1985
International Business Machines, Manufacturing Engineering Intern	1982

RESEARCH INTERESTS

Solid mechanics and materials, specifically: 1) constitutive modeling of natural and manufactured heterogeneous and/or anisotropic materials, and 2) investigation of bifurcation phenomena and instability problems. Materials currently under investigation include submicron fiber reinforced composites and high porosity materials: sandstone, metal foam, honeycombs and trabecular bone. Porous materials work employs theoretical, experimental and computational approaches to develop a fundamental understanding of the deformation behaviors of each material individually, and of porous materials in general. Current work includes characterization and modeling of the onset, interaction and propagation of localized and diffuse instabilities. Research goals are to: 1) establish connections between material micro/mesostructure and macrostructural behavior, and express these connections in constitutive models; and 2) develop theoretical frameworks to model the instability behaviors observed in porous materials with diverse micro/mesostructures. Recent composites work focuses on hierarchical modeling, using nanoscale and microscale models to predict macroscale bulk material properties.

SPONSORED RESEARCH

NSF REU Supplement CMS- 0531323, “Characterization and Modeling of Strain Localization in Metal Foams,” PI: K.A. Issen, \$5,000, 2005-2006, Engineering Division (supports one undergraduate student).

NSF REU Site Award EEC-0453404 (Co-sponsored by AFOSR), “Nanoscale Science and Engineering for Materials Systems and Materials Processing,” PI: J. Moosbrugger, Co-PI: K. Issen, \$249,696, 2005-2007 (supports nine undergraduate students each summer for three years).

NYSERDA Award, “Feasibility of Energy Efficient Manufacture of Continuous Sub-micron Carbon Fibers,” \$50,000, PI: J. Moosbrugger, Co-PI’s: D. Morrison, I. Sokolov, K.A. Issen, 2004-2005.

NSF REU Supplement CMS-0429835, “Characterization and Modeling of Strain Localization in Metal Foams,” PI: K.A. Issen, \$5,000, 2004-2005, Engineering Division (supports one undergraduate student).

NSF SGER Award CMS-0422045, “Characterization and Modeling of Strain Localization in Metal Foams,” PI: K.A. Issen, \$60,000, 2004-2006, Engineering Division (supports one graduate student).

NSF Award EAR-0310085, “Further Investigation of the Onset and Evolution of Compaction and Dilation Bands,” PI: K.A. Issen, \$60,000, 2003-2004, Earth Sciences Division (supports one graduate and two undergraduate students).

NSF Award CMS-0216286, “Acquisition of an Axial Servo Hydraulic Test System (Universal Testing System) for Research and Teaching in Civil and Mechanical Engineering at Clarkson University,” PI: M.M. Lopez, Co-PI’s: K.A. Issen, D.J. Morrison, J.P. Dempsey, L. Minnetyan, \$206,794, 2002-2005.

NSF Award EAR-0006932, “Experimental and Theoretical Investigation of Compaction and Dilation Bands,” PI: K.A. Issen, \$120,000, 2001-2003, Earth Sciences Division (supported one graduate and two undergraduate students).

GE Faculty of the Future Award, PI: K.A. Issen, \$15,000, 2000-present.

HONORS AND AWARDS

Outstanding Advisor Award, Clarkson University, 2005.

Teaching Excellence, Clarkson University School of Engineering, Spring 2005.

NSF Summer Institute on Nano Mechanics and Materials, Tuition Scholarship, 2004.

Teaching Excellence, Clarkson University School of Engineering, Fall/Spring 2004.

Outstanding New Teacher Award, Clarkson University, 2003.

Teaching Excellence, Clarkson University School of Engineering, Spring 2003.

NSF CMS Workshop for the Advancement and Retention of Underrepresented and Minority Engineering Educators, 2003.

Teaching Excellence, Clarkson University School of Engineering, Fall 2002.

ASME Minority Leadership Program Internship, 2001-2002.

Fellow, Outdoor Women’s Leadership Seminar (Engineering Information Foundation sponsored), 2001-2003.

Engineering Education Scholars Program (NSF sponsored), University of New Hampshire, 2000.

GE Faculty of the Future Internship, Northwestern University, 1999-2000.

Walter P. Murphy Fellowship in Theoretical and Applied Mechanics, Northwestern University, 1997-1998.

Abbott Laboratories Annual Team Exposition: Showcases top performing teams during National Quality Month, 1996 (team leader).

Abbott Laboratories Annual Team Exposition: Showcases top performing teams during National Quality Month, 1995 (team leader).

Abbott Laboratories Chairman's Award for excellence in teaching Team Problem Solving, 1994.

Abbott Laboratories Chairman's Award for outstanding achievement in implementing a corporate-wide computerized maintenance management system, 1990.

Abbott Laboratories Engineering Management Leadership Program: Develops young engineers with strong management potential, 1990.

STUDENT HONORS AND AWARDS

Dionne M. Dixon, NSBE Regional Student Paper Competition, First Place, 2003.

David E. Farrell, Walter P. Murphy Fellowship in Mechanical Engineering/Theoretical and Applied Mechanics, Northwestern University, 2003-2004.

Matthew M. Braun, Honorable Mention, NSF Graduate Research Fellowship Application, 2003.

Dionne M. Dixon, Ronald E. McNair Scholarship, Clarkson University, 2003.

Melissa C. Richards, Ronald E. McNair Scholarship, Clarkson University, 2003.

Exxon Mobil Foundation Grant, "Exploring Engineering" Program for High School Girls, Clarkson SWE Student Section, (\$1550), 2003.

Thadeus P. Casey, SES Student Paper Competition, Third Place, 2002.

ASME Diversity Action Grant, "Engineering a Storm Shelter" Outreach Program for Middle School Girls, Clarkson ASME Student Section, (\$1000), 2002.

TEACHING INTERESTS

Teaching interests include: 1) use of collaborative learning, peer instruction and active learning methodologies in undergraduate engineering courses, 2) assessment of the effectiveness of instructional methods in increasing students' understanding of fundamental concepts, including development of concept inventory tools, and 3) investigation of the influence of student learning styles/personality types and different instructional methods on student performance.

TEACHING EXPERIENCE

Clarkson University

2000 – Present

Outstanding New Teacher Award, 2003

School of Engineering Teaching Excellence: I have received this recognition every semester it has been awarded since the program inception in Fall 2002.

Course Taught

(Teaching evaluations: x.x/5.0; University average: 4.1) [Course enrollment]

ES222 Strength of Materials

Fall 2005 () [55]

Fall 2004 (4.9) [40]

Fall 2003 (4.9) [25]

Spring 2003 (4.6) [75]

ME324 Dynamics of Mechanical Systems

Fall 2002 (4.8) [46], (4.6) [48]

Fall 2001 (4.5) [34]

Fall 2000 (4.5) [57]

ME457/ME557/AE457/CE421/CE521 Mechanics of Composite Materials

Spring 2005 (4.9) [45]

Spring 2004 (4.6) [35]

Spring 2002 (4.7) [37]

Spring 2001 (4.1) [29]

ME610 Mechanical and Aeronautical Engineering Seminar, Spring 2004

Northwestern University

1999

Faculty Intern, Dynamics of Mechanical Systems (teaching evaluations: 80%)

Teaching Assistant, Statics (teaching evaluations: 95%)

Abbott Laboratories, Inc.

1990 – 1997

Certified Trainer, Total Customer Satisfaction Program (teaching evaluations: 85%)
Interdisciplinary Team Problem Solving
Diversity Awareness

PROFESSIONAL SERVICE

National

Journal Reviews: Journal of Structural Geology, Journal of Geophysical Research, Journal of Engineering Mechanics, Geological Society of London, Journal of Engineering Materials & Technology (Trans. of ASME), Journal of Professional Issues in Engineering Education and Practice (ASCE).

Proposal Reviews: National Science Foundation, US Department of Energy

Committees: ASCE Granular Materials Committee; ASME Geomechanics Technical Committee

Workshops: Organizer, Compaction Localization Workshop, October 2004, Warrenton, VA (sponsor: US Department of Energy, Basic Energy Sciences).

Clarkson University

Honors Council: Research Committee, Undergraduate Thesis Advisor, 2001-Present

School of Engineering: Education Strategic Planning Task Force, 2004-Present

University Teaching Excellence Committee, 2003-Present

McNair Scholars Program, Undergraduate Research Advisor, 2003-Present

Society of Women Engineers, Clarkson Student Section Advisor, 2002-Present

Horizons Engineering Outreach Program for Middle School Girls: Panelist, 2001, 2002; Lecturer, 2004.

Northwestern University

Preparing Future Engineering Faculty Program (program founder), 1999-2000; Program is still conducted every two years by the Graduate Student Society

Engineering Career Program for Girls, Panelist, 1999

Departmental – Mechanical & Aeronautical Engineering, Clarkson University

Recruiting and Teaching Committee, 2001-Present

Curriculum Committee, 2000-Present

Graduate Committee, 2000-2001

ASME Student Section Advisor, 2001-2002

SUMMARY OF INDUSTRY EXPERIENCE

Managed a technical support group responsible for training, programming and operation of a computerized maintenance management system used by 1400+ employees producing over \$200 million in annual sales.

Formed, directed and facilitated numerous interdisciplinary teams in developing and implementing cost reduction and process improvement projects and solutions.

Provided technical support for the plant systems and utilities supporting a one million square foot research, development and manufacturing complex.

Designed and analyzed structures supporting piping, HVAC ductwork and equipment subject to three-dimensional loading conditions in nuclear power stations.
