

RAGHUNATHAN RENGASWAMY

Associate Professor
Department of Chemical Engineering
Clarkson University, Potsdam
NY 13699-5705, USA
E-mail: raghu@clarkson.edu
Webpage: www.clarkson.edu/~raghu
Group Webpage: www.clarkson.edu/~raghu/prociss

1. Education

- Ph.D. (1995) Chemical Engineering, Purdue University, West Lafayette, IN 47907, USA
Thesis: A Framework for Integrating Process Monitoring, Diagnosis and Supervisory Control
- B. Tech (1990) Chemical Engineering, Indian Institute of Technology, Madras, 600036, India
Thesis: An Expert System for VLE Equation Selection

2. Professional Experience

- Jan 02 – Present Associate Professor, Department of Chemical Engineering, Clarkson University, Potsdam, NY 13699-5705.
- Jan 01 – Dec 01 Visiting Assistant Professor, School of Chemical Engineering, Purdue University, West Lafayette, IN 47907, USA.
- Jan 96 – Jan 2001 Assistant Professor, Department of Chemical Engineering, Indian Institute of Technology, Bombay, 400 076, India
- Aug 95 – Dec 95 Senior Engineer Asea Brown Boveri (ABB), Bangalore, India
- Aug 90 – June 95 Research and Teaching Assistantships at School of Chemical Engineering, Purdue University, West Lafayette, IN 47907

3. Research Interests

- Fuel Cell Technology
 - Novel Electrode and Membrane Fabrication for PEM Fuel Cells
 - Modeling, Diagnostics and Control of PEM and Solid Oxide Fuel Cells
- Energy Systems
- Systems Biology
- Multi-Scale Modeling and Optimization
- Controller Performance Assessment and Process Fault Diagnosis

4. Honors and Awards

John W. Graham Jr. Faculty Research Award, Clarkson University, 2006

International Federation of Automatic Control (IFAC) Best Paper Prize, 2002-2005, for the paper "Application of Signed Digraphs-Based Analysis for Fault Diagnosis of Chemical Process Flowsheets " in Engineering Applications of Artificial Intelligence Journal in the category - Application-oriented paper on Symbolic AI Approaches (Co-authors Mano Ram Maurya and Venkat Venkatasubramanian)

Best Paper of the Session award at the American Control Conference, Boston, 2004.

Omega Chi Epsilon, Professor of the Year Award (Chemical Engineering), Clarkson University, 2003.

Keynote Lecture delivered at the 4th IFAC Workshop on On-line Fault Detection and Supervision in the Chemical Process Industries, Korea, 2001

Indian National Academy of Engineering (INAE) Young Engineer Award for the year 2000 awarded to outstanding engineers by the Academy

Awarded the "CAST Director's Award" for the best poster presented at the AIChE Annual Meeting in Los Angeles, 2000.

John Wiley & Sons, NY, USA in their Newsletter Inside R&D published a story "Networking Sensors - No Easy Task" on our work on sensor location.

A news item "*Online Cures, Online Prevention*" on my Ph.D work on Qualitative Trend Analysis was published in Hydrocarbon Online, April 27, 1999.

Guided a project "Qualitative Simulation in Process Engineering" that was selected by the Indian National Academy of Engineering (INAE) for award as one of the most innovative projects at the Bachelor's level (all disciplines), 1999.

David Ross Fellowship while at Purdue, USA, 1991-1993.

Awarded Undergraduate Merit scholarship while at IIT Madras, 1986-1990.

5. Grants, Contracts and Consultancy

While at Clarkson University

Awarded

1. "Issues in Non-Equilibrium Reactive Distillation", (With L. N. Sridhar, UPRM), NSF, \$281,397, 2004-2007.

2. "Fuel Specific SOFC Design and Control", (With P. Pillay, EE), **DOD/Nanodynamics** \$280,000, 2005-2007.
3. "Theoretical and Experimental Study of Multivariable Control of PEM Fuel Cells" **ACS-PRF**, \$80,000, 2005-2007.
4. "Advanced Diagnostics of PEM Fuel Cells", NY State Energy Research and Development Authority (**NYSERDA**), \$62,148, 2005-2006.
5. "Productivity Improvement in Industrial Processes through Diagnosis and Compensation of Stiction in Control Valves", NY State Energy Research and Development Authority (**NYSERDA**), \$47,148, 2005-2006.
6. "A New Control Method for Improving Part Consistency for Injection Molding" (With Greg Campbell), NY State Energy Research and Development Authority (**NYSERDA**), \$54,648, 2005-2006.
7. "PhD Program Titled Loop Scout Enhancements", **Honeywell**, \$29,935, 2004-2005.
8. "A Predictive Model for Reactor Yield", **KBR**, \$8,000, 2005.
9. "Performance Analysis of Phosphoric Acid Fuel Cells (PAFC) Using Detailed Dynamic Models", **IIT Bombay/NMRL**, \$10,400, 2005.
10. "Sensitivity Analysis of a predictive model for reactor yield", **KBR**, \$8000, 2006.
11. "GOALI: An Integrated Framework for Stiction Detection and Compensation in Control Loops", **NSF**, \$262,909, 2006-2009.
12. "Three year Collaborative Project on PEM Fuel Cells", with IIT Madras India, funded by Department of Science and Technology (**DST**), India, Approx. \$15,000, 2006-2009.
13. Supplement to the project "Theoretical and Experimental Study of Multivariable Control of PEM Fuel Cells" to fund a fellow to spend a summer at Clarkson, **ACS-PRF**, \$8000, 2007.
14. "GOALI: An Integrated Framework for Stiction Detection and Compensation in Control Loops", **REU Supplement**, **NSF**, \$12,000, 2007
15. Consultant to Reliance Industries for their participation in the Stanford Fuel Cell Consortium on Solid State Proton Conducting Direct Methanol Fuel Cells, 2007- .
16. "Modeling of Gasifiers", Honeywell, \$10,000, 2007.

Pending

17. "Development and Characterization of PEM Fuel Cell and Stacks", (coPI: Greg Campbell), submitted to NSF, \$318,952.
18. "Development of Tubular PEM Fuel Cells", (coPI: Greg Campbell), submitted to NYSERDA, \$99,581
19. "Development of Direct Methane SOFC for Commercial Applications", (coPI: Prag Pillay), submitted to NYSERDA, \$177,904.
20. "Next Generation Polymer Processing Using Advanced Controls", (coPI: Greg Campbell), submitted to Honeywell as a subcontract for a larger NIST-ATP proposal lead by Honeywell, \$523,000.

Awarded At IIT Bombay (1996-2000)

21. "Development of Composite/Hybrid Lower Order Models from Process Data for Control of Chemical Processes", funded under SERC Scheme for Young Scientist, DST, India. (Rs. 250,000 – Approximate Dollar Equivalent \$5000)
22. "Studies in Control Relevant Process Identification", Co-Investigator, funded by DST, India under the scheme of SRC, Principal Investigator: R.D. Gudi. (Rs. 1,000,000 - Approximate Dollar Equivalent \$20,000)
23. "Nonlinear Model for Rotary Slosh in Fuel Tanks of Launch Vehicles", Co-Investigator, funded by ISRO, India. Principal Investigator: N. Ananthakrishnan. (Rs. 300,000 - Approximate Dollar Equivalent \$6000)
24. A consultancy project on the development of a process simulator for LPG recovery unit with ABB completed, June 1996 - May 1997, IIT Bombay. (Rs. 250,000 - Approximate Dollar Equivalent \$5000)
25. Member of the Mission Mode Project on the Development of a Multi-Purpose Simulator for the Process Industry, IIT Bombay (CAD Center Faculty). (Rs. 8,000,000 - Approximate Dollar Equivalent \$160,000)
26. Simulation of a Multi-tubular reactor for the production of MIBK from DMK for NOCIL Bombay under the mission mode project completed, March - Dec, 1996, IIT Bombay (CAD Center Faculty). (Rs. 250,000 - Approximate Dollar Equivalent \$5000)
27. Simulation of IPA production facility of NOCIL Bombay under the mission mode project completed, March 1996 - June 1998, IIT Bombay (CAD Center Faculty). (Rs. 250,000 - Approximate Dollar Equivalent \$5000)

28. Consultant to ABB, India in their Oil Movement & Storage (OMS) projects and Operator Training Simulator (OTS) projects. (Rs. 50,000 - Approximate Dollar Equivalent \$1000)
29. A consultancy project on development of an Object-Oriented Java Based Modeling Framework for the simulation of an Industrial FCCU with Madras Refineries Limited, Chennai and Invensys, Chennai. (Rs. 125,000 - Approximate Dollar Equivalent \$2,500)
30. Consultant to Aditya Internet Services Ltd., on their Project on Development of a Software for Pipeline Leak Detection. (Rs. 120,000 - Approximate Dollar Equivalent \$2,400)
31. A consultancy project on Soft Sensor Development using NN, PCA and PLS Tools for Tata Honeywell Limited (THL), Pune, India (With Profs. R. D. Gudi and K. P. Madhavan). (Rs. 700,000 - Approximate Dollar Equivalent \$14,000)

49. Debangsu Bhattacharya, Raghunathan Rengaswamy and Caine Finnerty, "A Two-dimensional Dynamic Model for Tubular Solid Oxide Fuel Cell", presented at the Annual AIChE meeting, San Francisco, 2006.

8. Work in Progress:

Books:

1. Working on a Book on “Process Fault Detection and Diagnosis” (Co-authors: Prof. Venkat Venkatasubramanian, Purdue University and Prof. Shankar Narasimhan, IIT Madras, India)

9. Commercialization/Patents

“Title of the Invention: Stiction Compensation in Process Control Valves”, Ranganathan Srinivasan and Raghunathan Rengaswamy, Provisional Patent, Clarkson University.

International Patent filed by Honeywell.

“Title of the Invention: Performance Monitoring of Control Valves in Control Loops: Stiction detection using shape-matching approach”, Ranganathan Srinivasan, Raghunathan Rengaswamy, Randy Miller and Lane Desborough, Provisional Patent, Clarkson University.

“Title of the Invention: Performance Monitoring of Control Valves in Control Loops: Stiction detection using simultaneous estimation of stiction model and plant model”, Ranganathan Srinivasan, Raghunathan Rengaswamy, Randy Miller and Lane Desborough, Provisional Patent, Clarkson University.

Co-inventor (With Prof. Venkatasubramanian, Dr. Hiranmayee Vedam and Sourabh Dash) of "B-Splines Based Qualitative Trend Analysis System for Process Monitoring and Fault Diagnosis", developed at Purdue

10. Graduate Students Supervision

Current Graduate Students

1. Debansu Bhattacharya, PhD, Chemical Engineering, Clarkson University, "Fuel Specific SOFC Design and Control", in progress.
2. Ulaganathan Nallasivam, PhD, Chemical Engineering, “Development of Alternate Electrode Structures for PEM and Direct Methanol Fuel Cell Applications”, in progress.
3. Ravi K. Mandela, PhD, Chemical Engineering, Clarkson University, "Control and Optimization of Equilibrium and Non-equilibrium Reactive Separation Systems", in progress.
4. Himabindu Sunnam, MEng, Chemical Engineering, Clarkson University, "Alternate Electrode Structures for Enhanced PEM Fuel Cells", in progress.

Completed PhD (with current position)

5. Madhusudana Rao, PhD, Chemical Engineering, Clarkson University, "Modeling and Optimization of PEM Fuel Cells", Clarkson University, 2006. (**currently with UTC Power, Connecticut**)
6. N. Sridharkumar, PhD, Chemical Engineering, Clarkson University, "Methods and Sensor Placement for Fault Detection and Diagnosis with Novel Applications", Clarkson University, 2006. (**Currently a Post-Doctoral Fellow at Norwegian Technological University (NTU), Norway**)
7. S. Ranganathan, PhD, Chemical Engineering, Clarkson University, "Control Loop Performance Monitoring: Modeling, Diagnosing and Compensating Stiction Phenomenon in Process Control Valves", Clarkson University, 2005. (**Currently with Honeywell**)
8. Pramod Vachhani, PhD, Chemical Engineering, Clarkson University, "Integrating Diagnostic Knowledge With Nonlinear Estimation for Comprehensive Fault Diagnosis", Clarkson University, 2004. (**Currently with Bloom Energy, a Solid Oxide Fuel Cell Company**)
9. Mani Bhushan, PhD, Chemical Engineering, IIT Bombay, "A Comprehensive Framework for Sensor Network Design for Efficient and Reliable Fault Diagnosis", IIT Bombay, 2001. (**Currently an Assistant Professor at IIT Bombay, India**)
10. P. Sarma, PhD, "Intelligent Control of Nonlinear Processes With Genetic Fuzzy Logic and Gain-Schedule Structures", Chemical Engineering, IIT Bombay, 2000. (**Currently with Aditya Birla Research group, India**)

Completed MS

11. N. Apte, MS, Statistics & Informatics, Department of Mathematics, IIT Bombay (1997), "Tearing for solving large systems in equation oriented simulators", Co-guide Kannan Moudgalya.
12. R. Raghuraj, MS, Chemical Engineering, IIT Bombay (1998), "Fault Diagnosis and Location of Sensors Based on Diagnosability Criterion in Complex Chemical Plants".
13. S. Ranganathan, MS, Systems & Control group, IIT Bombay (1998), "Design of Input Signals for System Identification and Control".
14. K. Sathyakant, MS, Systems & Control, IIT Bombay (1998), "Process Fault Diagnosis Using Nonlinear Robust Observers".
15. S. Mukherjee, MS, Chemical Engineering, IIT Bombay (1999), "A Knowledge-based System for Generation of Operating Procedures".

16. Gupte, MS, Chemical Engineering, IIT Bombay (1999), "Optimal Control of Bioreactors".
17. Manu Varma, MS, Chemical Engineering, IIT Bombay (1999), "Design of a Process for Concentration of Nitrogen in Oxidizers Off-gas".
18. S. Anisha, MS, Chemical Engineering, IIT Bombay (2000), "A Software for Integrated Safety Analysis in Process Plants".
19. V. Pramod, MS, Chemical Engineering, IIT Bombay (2000), "Data Reconciliation and Parameter Estimation in Chemical Engineering Systems".
20. Karthik Iyer, MS, Systems & Control group, IIT Bombay (2000), "Evaluation of an Observer Based Identification Method For a Special Class of Nonlinear Systems".
21. Pradeep Autale, MS, Chemical Engineering (2001), "A Software for Simulation of Crude Distillation Units".
22. Kunal Shah, MS, Computer Aided Design and Engineering (2001), "Multipurpose Simulator - A Fuel Cell Case Study".
23. Archis Ghate, MS, Computer Aided Design and Engineering (2001), "Strategies for solving Algebraic, Differential Algebraic system of equations in process simulators".

Visiting Graduate and Other Students

1. Taehoon Oh (Myongji University, June 2004 – December 2005), "Reduced Order Models for Fuel Cells", funded by Korean National Science Foundation.
2. Sam Burnham (U. of Newcastle upon Tyne, Summer 2006), "Models for Injection Molding".
3. Gerardo Ruiz (Univ. of Puerto Rico at Mayaguez, Summer 2006), "Modeling of Dynamic Nonequilibrium Reactive Separation Systems".
4. Brian Bullocks (Research Assistant, Summer 2007), "

Undergraduate Research at Clarkson University

1. Sean Sutton (Clarkson), Honors Thesis, "Mathematical Modeling of Proton Exchange Membrane Fuel Cells for Diagnostic Purposes", 2004.
2. John Solsky (Clarkson, jointly with Prof. Ian Suni, Summer 2006), Undergrad Research, "Fabrication and Modeling of Nanostructured Fuel Cell".
3. Pedro Cardona (UPRM, Summer 2006), Undergrad Research, "Signed Directed Graph (SDG) model of Programmed Cell Death (PCD)".

4. Brian Bullocks (Clarkson, Summer 2006), Undergrad Research, "Model Based Control of Injection Molding Process".
4. Andrew Vackel (Clarkson, Summer 2006), Undergrad Research, "Fabrication and Modeling of Nanostructured Fuel Cell".
5. Kaitlynn Penoyer (Clarkson, Summer 2007), Undergrad Research, "Three Tank Experimental Setup".
6. Matt Debrowski (Clarkson, Summer 2007), Undergrad Research, "Three Tank Experimental Setup".
7. Nate Jean (Clarkson, Summer 2007), Undergrad Research, "Catalyst Preparation for PEM Fuel Cell Applications".

11. Teaching Experience

a. Courses Taught

CH 250	Chemical Process Calculations, Fall 2005,2006
CH 561	Chemical Engineering Analysis, Clarkson University, Fall 2004
CH 480	Design I, Clarkson University, Fall 2003.
CH 485	Process Dynamics and Control, Clarkson University, Fall 2002.
CH 481	Design II, Clarkson University, Spring 2002, 2003, 2004, 2005.
CHE 456	Process Dynamics and Control, Purdue University, Fall 2001.
CHE 450	Design and Analysis of Processing Systems, Purdue University, Spring 2001. (Co-taught with Profs. Venkatasubramanian and Reklaitis)
CHE 435	Chemical Engineering Design Laboratory, Purdue University, Spring 2001. (Co-taught with Prof Wang and Dr. Muench)
CL 460	Mathematical Methods in Chemical Engineering, Undergraduate level, IIT Bombay, Spring 1997, 1998, 1999, 2000.
CL 351	Mass Transfer-I, Undergraduate level, IIT Bombay, Fall, 1996. (Co-taught with Prof. K. V. Venkatesh)
CL 352	Mass Transfer-III, Undergraduate level, IIT Bombay, Fall, 1996. (Co-taught with Prof. K. V. Venkatesh)

- CL 453 Computer Aided Design Laboratory, Undergraduate level, IIT Bombay, Fall, 1999, 2000.
- CL 211 Computational Laboratory, Undergraduate level, IIT Bombay, Fall, 1998.
- CL 688 Artificial Intelligence in Process Engineering, Postgraduate level, IIT Bombay, Fall, 2000.
- CL 694 Artificial Intelligence & Statistical Techniques in Process Control, Postgraduate level, IIT Bombay, Spring, 1998.
- CL 691 Computational Laboratory, Postgraduate level, IIT Bombay, Fall, 1999
- CL602 Mathematical & Statistical Methods in Chemical Engineering, Postgraduate level, IIT Bombay, Fall 1997, 1998, 1999 (Co-taught with Prof. Juvekar)

b. Participation in Summer Institutes and Other Programs

Participated in a Fuel Cell short course and workshop in Calgary, Canada, February 26 –28, 2003.

Visiting Professor at University of Alberta, Edmonton, Canada June 26 – July 24, 2002. Delivered lectures in a summer course on “Fault Detection and Diagnosis”.

Participated in SACHE 2002 workshop, April 21-24, 2002.

Short-term scholar at Department of Chemical Engineering, Purdue University, USA, June-July, 2000

Series of lectures in Process Systems Engineering, University of Delaware, USA, July - Aug, 1999.

Short-term scholar at Department of Chemical Engineering, Purdue University, USA, Aug - Sep, 1999.

A CEP course on "Optimization and Optimal Control in Aerospace Systems", Guest Instructor (Linear Programming and Constrained Optimization), IIT Bombay, Jan 1998.

A course on "Process Control" for refinery personnel conducted at IPCL, Baroda, India, Guest Instructor, Jan 1998.

A CEP course on "Nonlinear Control of Aerospace Dynamics", IIT Bombay, Guest Instructor (Feedback Linearization), Jan 1998.

A Continuing Education Program (CEP) course on "LQG/LQR in the Aerospace Dynamics and Control", Guest Instructor, IIT Bombay, 1997.

Lectures on applications of "Differential Equations in Chemical Engineering" at University of Bombay, Mathematics department for the University Faculty, 1996.

Visiting Research Scholar at Dept. of Automatic Control, Lund, Sweden, Sept - Dec, 1994. Worked on a research project "Knowledge-based Real-time Control Systems".

c. Contributions to Course, Curriculum and Laboratory Development

At Clarkson University

Introduced a Fuel Cell-Electrolyzer Experiment in the Senior Lab at Clarkson University

Enhanced the Liquid Level Control Experiment to perform computer control to be used in the Junior Lab at Clarkson University. Taught the undergraduate students nonlinear phenomena such as stiction in control loops through this experiment. In the process of developing a three tank experimental setup to teach the whole gamut of controller performance assessment problems to the Undergraduates.

Introduced a Biological case study (co-protein manufacture) in the senior design (Design II) course at Clarkson University

Co-taught a Honors Problem Solving Course on Feasibility of fuel cell cars by 2010. Mentored a group of students on the technology aspects. Arranged for a visit to a fuel cell company as a part of the course. The final outcome of the course was a public forum for the local community on fuel cell cars organized completely by the students with participation from the principal engineer in charge of the fuel cell development program at GM.

At IIT Bombay

Developed a new course, CL 688, on *Artificial Intelligence in Process Engineering* at IIT Bombay. This inter-disciplinary course introduces AI concepts and techniques in the context of various problems in process engineering, thus demonstrating the utility of AI as a framework for engineering problem-solving.

Developed a new course, CL 694, on *Artificial Intelligence & Statistical Techniques in Process Control* at IIT Bombay. This course is geared towards exploring emerging new techniques in the area of process control.

Organized a *Workshop on Multivariable Model Predictive Control in Process Industry* for ABB India, held on October 13-18, 1997 at IIT Bombay.

Organized (with Profs. Gudi and Madhavan) a *Workshop on Inferential Property*

Prediction and Fault Diagnosis Using Neural Networks and Statistical Methods held on November 8-10, 2000 at IIT Bombay. It was attended by 15 external participants from industry.

12. Professional Activities

Organizer: Tutorial session on Oscillation Diagnosis and Controller Performance Assessment in the American Control Conference (ACC 2006) to be held in Minneapolis. Other Participants: Alexander Horch, ABB Germany; Sirish Shah, U. of Alberta, Canada; Sachi Dash, Honeywell, Phoenix; Kostas Tsakalis, ASU.

Co-chairman: A session on Process Operations in the PSE conference held at Colorado, 2000. Sessions in the IFAC conference, CHEMFAS held at Korea in 2001.

Member: Committee for reviewing All India Council for Technical Education (AICTE) projects.

Reviewer: ACS-PRF proposals
DOE proposals
AIChE Journal
Computers and Chemical Engineering
I&EC Research
Chemical Engineering Science
IEEE transactions on Systems Man and Cybernetics
IEEE transactions on Control Systems Technology
Control Engineering Practice
Journal of Process Control
Chemical Engineering Communications
Nonlinear Dynamics
Engineering Applications of Artificial Intelligence
Information Sciences
IEEE Transactions on Industrial Electronics

13. Professional Memberships

Member: American Institute of Chemical Engineers (AIChE)

Member: American Chemical Society (ACS)

14. University Services

Member and Secretary: Departmental Post-Graduate Committee (DPGC) (IIT Bombay)

Advisor: Omega Chi Epsilon – Delta Chapter (2002 -), Class of 2006 (Clarkson)

Member of School of Engineering Web Committee, 2004 (Clarkson)

Member, Graduate Committee, Fall 2006 - Current

Participated in the Spring, Fall 2005 Open House

Ph.D Graduate Committees
