Course Description: Prerequisites: Math \#01.122(Precalculus) or 60 on the CLM exam This course begins with a discussion of functions, the limit concept and continuity. The concept of a derivative is introduced and the student learns to differentiate algebraic functions, exponential, functions, logarithmic and trigonometric functions. Differentiation is applied to analysis of functions, extreme problems and to problems in related rates. The integral as the limit of a sum is linked to the antiderivative by the Fundamental Theorem of Calculus and used to find areas.

Course Objectives: Students will demonstrate the ability to: (i) compute limits; (ii) differentiate and integrate polynomial, rational, algebraic, exponential, logarithmic and trigonometric functions; (iii) use differentiation to solve extreme and related rate problems, and (iv) use integration to find areas and volumes.
Technology Sources: The Mathematics department policy recommends the TI-89 for this course. The instructor will use the TI-89 in class. Mathematica software will also be used in this class.

## Course Contents:

1. Limits and Continuity
2. Differentiation
3. Applications of the Derivative
4. Integration
5. Applications of the Integral

Grading: At any point during the semester, you may determine your standing by computing your grade. This can be done by adding the points in each category.

| Mathematica Projects | 50 points |
| :--- | :--- |
| Homework \& Quizzes | 100 points |
| Three Tests | 100 points each for a total of three tests |
| Final Test | 150 points |

Grades are awarded according to the following tableaux:

| Score | Grade |
| :---: | :---: |
| $600-540$ | $\boldsymbol{A}$ |
| $540-480$ | $\boldsymbol{B}$ |
| $480-420$ | $\boldsymbol{C}$ |
| $420-360$ | $\boldsymbol{D}$ |
| $\leq 360$ | $\boldsymbol{F}$ |

Scores falling on a boundary are at the discretion of the instructor based on the level of effort and commitment
shown by the student during the semester.
Attendance Policy and Makeup work: Full attendance is expected at every class meeting. Absence will affect your grade. Makeup tests/quizzes/etc., without an excused absence, are unacceptable. If you must miss class, you must email or phone my office on the day of the missing class, providing information of your name and phone number, the reason for your absence and the date you anticipate returning. You must also produce documentation supporting your absence. When you miss class it is your responsibility to find out what material you missed from your peers and be prepared for upcoming class elements. No private lessons can be given. Any assignment turned in past the specified due date and time will receive a score lowered by 5 point for each day it is late.
Homework and Quizzes: You are expected to do the homework. The homework problems form the basis for the exam it is essential to be able to successfully work all assigned problems. All assignments are expected to be completed by the next class meeting. I will be collecting your homework at each of the exams for grading purposes.

Short quizzes will be given. Quizzes will generally cover material on homework assignments. Tutoring and study groups: I encourage you to work together on homework assignments, to look at each other's solutions, and to explain answers to each other. This is not the same thing as copying each other's homework. You take the tests alone and without help, so if you cannot explain to your tutor, classmate, or teacher how to solve the problem, then you have not learned how to solve it, and you need to study it more (perhaps by visiting me during my office hours).

Project: There will be one Mathematica project, the due date will be given in class.
Tests: There will be three 60 -minute tests, the dates will be given at least a week before the tests. The materials covered in the tests will be as follows:

Test 1: all sections of Chapter 1 and Chapter 2
Test 2: all sections of Chapter 3
Test 3: all sections of Chapter 4
Final: comprehensive.
Tests are not multiple-choice. The final exam will be held during final week (May 1 through May 5, 2012). Specific date, time and location will be announced when it becomes available. All exams is based entirely on the examples given in class, homework and quizzes. It is in closed book and notes, thus students who cannot master the basic homework problems will be unlikely to do well on exams.

Note: The deadline to drop a full-semester course without academic penalty is 11PM, Monday, January 23rd, 2012.

Academic Honesty: Dishonesty includes cheating on a test, falsifying data, misrepresenting the work of others as your own (plagiarism), and helping another student cheat or plagiarize. Academic dishonesty will result in a grade of zero on that particular assignment; serious infractions of the Academic Honesty policy will result in failure of the course. For complete information about the University's policy on Academic Honesty, consult the Student Handbook 2000-2001.
ADA Syllabus Statement: If a student has a disability that qualifies under the American with Disabilities Act (ADA) and requires accommodations, he/she should contact the Office for Disability Accommodations (ODA) for information on appropriate policies and procedures. Disabilities covered by ADA may include learning, psychiatric, physical disabilities, or chronic health disorders. Students can contact ODA if they are not certain whether a medical condition/disability qualifies.

## Homework Problems(Calc I Jon Rogawski's Text-2nd edition): subject to change

HW1: Sec.1.1: 30, 44, 48, 49, 59.
HW2: Sec.1.2: 25, 29, 37, 39.
HW3: Sec.1.4: 3, 7, 19, 21, 23, 41.
HW4: Sec.1.5: 3, 17, 31, 33, 39, 43, 49.
HW 5: Sec.1.6: 1, 7, 9, 25, 27, 29, 35.
HW 6: Sec.2.1: 1, 7, 15, 23, 29.
HW 7: Sec.2.2: 21, 23, 25, 27, 29, 31, 37, 39, 45, 47.
HW 8: Sec.2.3: 17-29 odd.
HW 9: Sec.2.4: 1, 5, 19, 23, 25, 27, 55, 67, 71, 73, 77, 79.
HW 10: Sec.2.5: 9, 15, 19, 25, 27, 39, 47, 49, 51, 55.
HW 11: Sec.2.6: 7, 9, 13, 23, 25, 27, 35.
HW 12: Sec.2.7: 3, 5, 9, 11, 15.
HW 13: Sec.2.8: 1, 3, 5, 13.
HW 14: Sec.3.1: 7, 11, 13, 21, 23, 53, 55, 57.
HW 15: Sec.3.2: 9, 11, 23, 27, 39, 47, 49, 55, 57, 71.
HW 16: Sec.3.3: 23, 31, 33, 35, 45, 51, 53.
HW 17: Sec.3.4: 5, 7, 9, 11, 13.
HW 18: Sec.3.5 13, 17, 19, 27, 29, 39, 41, 53.
HW 19: Sec.3.6: 9, 13, 15, 17, 21, 37, 43.
HW 20: Sec.3.7: 9, 11, 13, 17, 35, 49, 51, 69, 77, 79, 93.
HW 21: Sec.3.8: 5, 11, 15, 17, 25, 31, 41.
HW 22: Sec.3.9: 3, 9, 11, 13, 15, 19, 23, 25, 45, 47, 49.
HW 23: Sec.3.10: 1, 7, 9, 17, 35, 43.
HW 24: Sec.3.11: 5, 9, 15, 17, 21, 25, 27, 29, 31.
HW 25: Sec.4.1: 13, 15, 19, 31, 33, 37, 45.
HW 26: Sec.4.2: 1, 7, 11, 15, 39, 47, 61.
HW 27: Sec.4.3: 1, 15, 21, 29, 33, 39, 45.
HW 28: Sec.4.4: 5, 9, 13, 29, 33, 43, 45.
HW 29: Sec.4.6: 3, 13, 15, 19, 21, 48.
HW 30: Sec.4.7: 33, 35, 45, 47.
HW 31: Sec.4.9: 25, 27, 33, 43, 45, 65, 67, 75.
HW 32: Sec.5.1: 7, 13, 19, 27, 33, 53, 73.
HW 33: Sec.5.2: 3, 7, 21, 37, 41, 81.
HW 34: Sec.5.3: 4, 23, 29, 35, 41, 57.
HW 35: Sec.5.4: 3, 7, 13, 21, 23, 31, 47.
HW 36: Sec.5.6: 33, 45, 67, 71, 85, 91.
HW 37: Sec.5.7: 3, 7, 13, 17, 43.
HW 38: Sec.6.1: 9, 11, 25, 27, 29, 45.
