

# AN INFILTRATOR

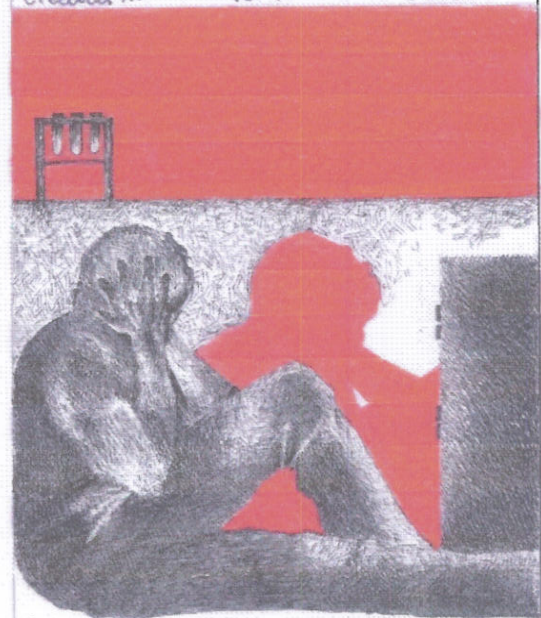

IN COSBI LAB.

I'm here in Cosbi, an institute who point at the overcoming of the distance between computer-science and biology. The 28 researchers from all the world who work at this project, have already constatate that the results of their reasearch works are in danger.

AND I... I WAS BORN FOR BLEHX.

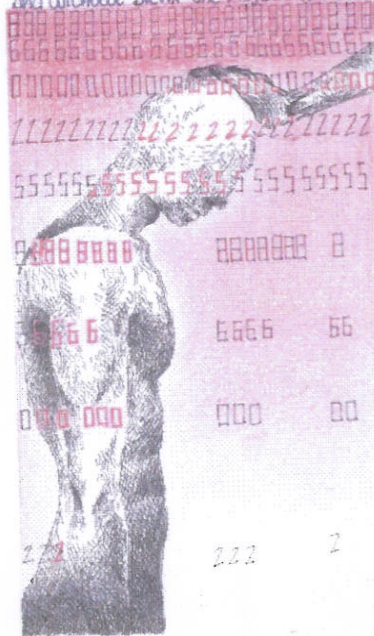

Created ... for ... Bien X.

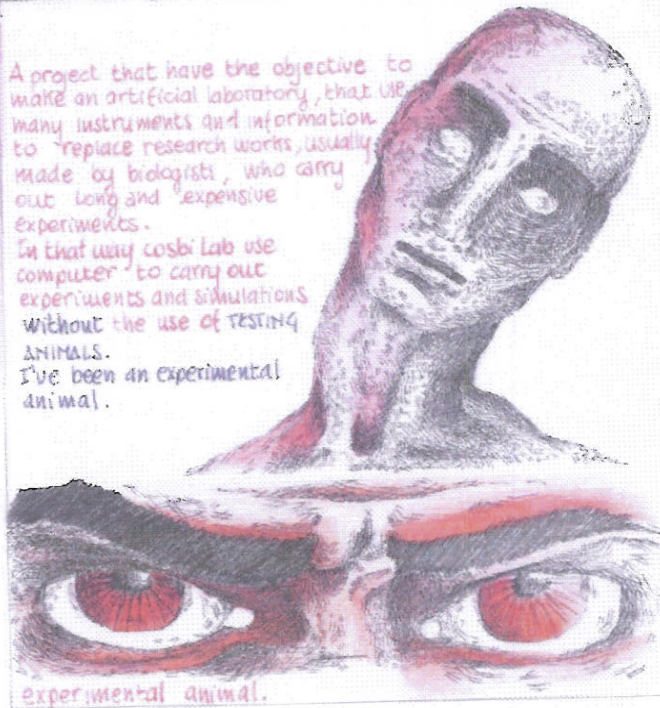

It is the fulcrum of Cosbi Lab, and I must steal it. It's a programming language planned by the reaserchers of the institute, to describe the behaviour of the biological systems and phenomenous.

I've been sent here like an infiltrator to Cosbi Lab, my duty is to seize and INFECT BLENK. My FATHER, don't want to allow anybody to use it. And without BLENK the project will fail.

A project that have the objective to make an artificial laboratory, that use many instruments and information to replace research works, usually made by biologist, who carry out long and expensive experiments. In that way cosbi lab use computer to carry out experiments and simulations without the use of TESTING ANIMALS. I've been an experimental animal.

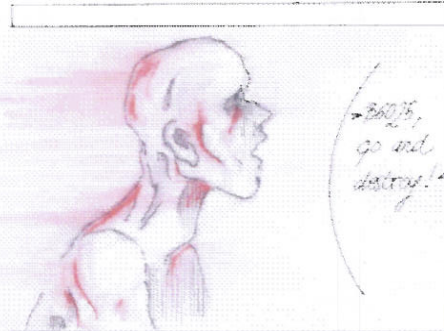

experimental animal.

That's a word  
I've learnt since  
I'm here in Cosbi  
Lab, among the  
researchers.  
I have only an  
**Objective**:  
to DESTROY Blenx  
and so COSBI LAB

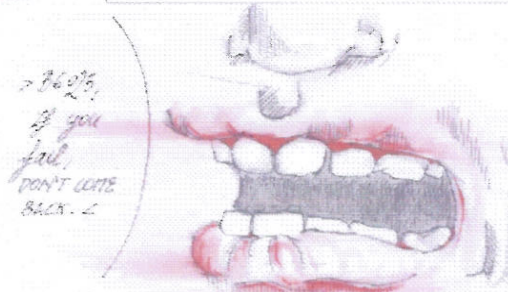

My father have  
never told me about  
their purpose.  
And never give me  
a name.

ONLY A CODE:  
**B6025.**

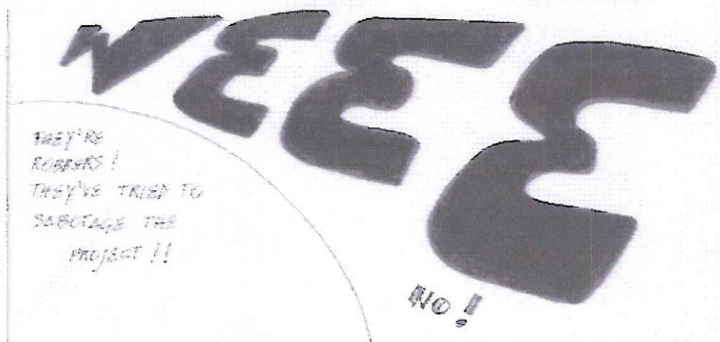

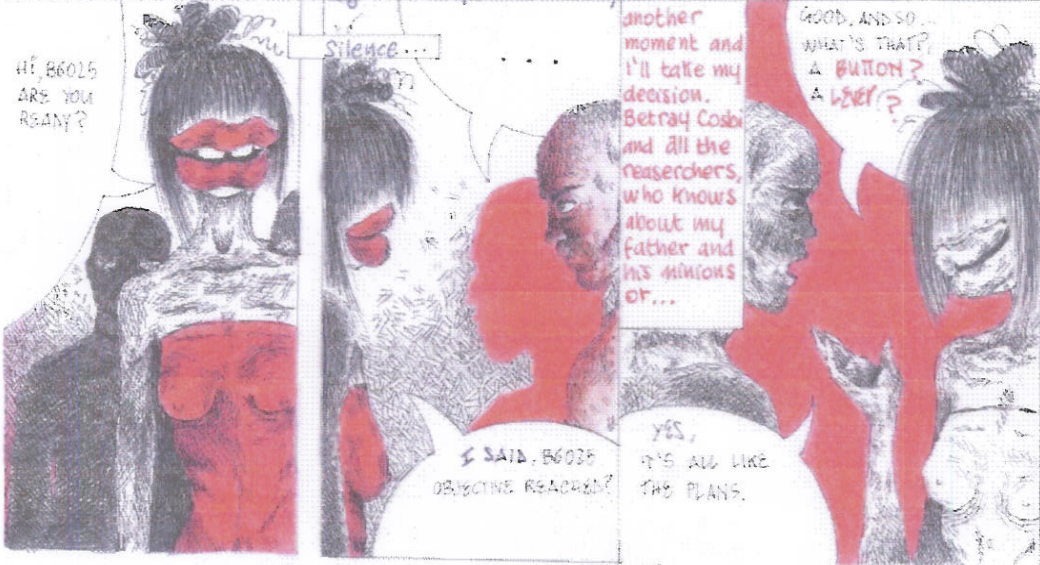

Staying among real people, real emotions  
and far from my father,  
helped me to understand a lot of  
things.

I've understood who I am,  
And I REFUSE TO be only an **experiment**.

words of a creator, not of a REAL FATHER.

And so this is the moment, this is the night when we have to reach the objective. I have the information to destroy the project, That's why I've perfectly understood its functioning. The reinforcements are arriving from my creator. They'll be here in few minutes... instants...

I'VE CHOSEN FATHER ... FREEDOM.
